

EE33-M

Humidity and Temperature Transmitter for High-end Meteorological Applications

E33-M is optimized for reliable measurement under demanding weather conditions. Besides accurate measurement of relative humidity (RH) and temperature (T), the device calculates all additional physical quantities like dew point temperature, absolute humidity and mixing ratio. A dual heating system prevents condensation on the RH sensor, on the sensing probe and on the filter cap, which leads to extremely short response time and fast recovery after condensing conditions. The measuring principle with separate RH and T probes enables precise continuous measurement even at permanent high humidity.

The proprietary E+E coating protects the RH sensor and its leads against corrosive and electrically conductive pollution. The probes are compatible with modern, ventilated radiation shields, like the LAM630.

With an optional connecting cable and the EE-PCS software (included in scope of supply) the user can easily perform an adjustment or a configuration of the outputs.

Typical Applications _

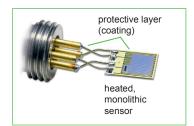

meteorology wind turbine generators road icing warning off-shore measurements

Features

monolithic RH sensor precise measurement close to condensation condensation prevention through dual heating protection against pollution and corrosion calculation of additional physical quantities

Monolithic Humidity Sensor_

The heart of EE33-M is the monolithic HMC01 sensor, developed and manufactured in thin-film technology by E+E Elektronik. HMC01 combines the moisture and heating element on a single substrate. Condensation is prevented by controlled heating of the sensor. The proprietary E+E coating protects the sensor and its leads against pollution and corrosion.

Radiation Shield

In order to minimize the impact of rain, snow, ice and solar radiation on the measurement the EE33-M must be mounted inside a radiation shield.

The radiation shield LAM630 is suitable for mounting onto a mast with 30-35mm diameter. Forced ventilation is provided by the control unit STEG6003. Up to 4 probes can be mounted using cable glands (\emptyset 18-25 mm).

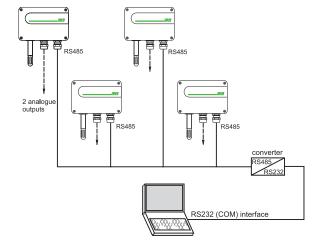

6 v1.1 / Modification rights reserved **EE33-M**

Network Compatibility / Ethernet Interface

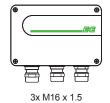

The optional RS485 interface (order code N) allows for building a network of up to 32 transmitters.

The measurement data can be collected in a shared database and made available for all kinds of further processing.

¹⁾ Refer to the working range of the humidity sensor.

EE33-M v1.1 / Modification rights reserved

²⁾ Can be easily changed by software.3) Refer to accuracies of calculated values (www.epluse.com/feuchtemessung).

The accuracy statement includes the uncertainty of the factory calibration with an enhancement factor k=2 (2-times standard deviation). The accuracy was calculated in accordance with EA-4/02 and with regard to GUM (Guide to the Expression of Uncertainty in Measurement).

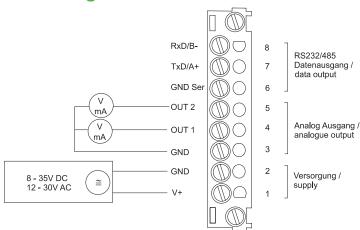

Working Range Humidity Sensor

The grey area shows the allowed measurement range for the humidity sensor.

Operating points outside of this range do not lead to destruction of the sensor, but the specified measurement accuracy cannot be guaranteed.

Connection Diagram

Scope of Supply

- EE33-M Transmitter according to Ordering Guide
- Operation Manual
- Inspection certificate according to DIN EN 10204 3.1
- Cable connector RKC 5/7 for customer assembly, only for option co3 or co8
- Cable connector RSC 5/7 for customer assembly, only for option C06 or C08
- Y-junction for network connection, only for option ${\bf N}$ or ${\bf C08}$
- M16 cable gland, only for option co3, co6 or co8

Accessories / Replacement Parts (For further information, see data sheet "Accessories")

PTFE stainless steel filter
 Exchange membrane for PTFE stainless steel filter
 Stainless steel grid filter
 HA010114ME
 HA010109

- Interface cable for plug option C06 HA010311

- RS485 Kit (HW + SW) for network HA010601

- Mounting set for mast with Ø 34 - 54 mm HA010213

Radiation shield LAM630 with control unit HA010508

Calibration-Kit see data sheet "Humidity Calibration Kit"
 Configuration adapter see data sheet "EE-PCA"
